Nidhin Narayanan

Testing engineer at Webandcrafts
Kochi, Kerala, India

Summary

As a Junior Software Engineer - QA at Federal Operations and Services Ltd (FedServ), I contribute to ensuring the quality and stability of banking and fintech applications, including Core Banking Systems, payment platforms, and UPI integrations. My work emphasizes API, UI, and workflow testing, with a focus on data integrity, transaction critical logic, and seamless system communication. I hold a Bachelor's degree in Computer Science from Kerala University, complemented by certifications in Java Programming and SDET from QSpiders. My skills in test planning, test cases, and test management support my goal of enhancing release quality, minimizing production defects, and further building expertise in automation using Playwright.

Experience

Webandcrafts

Testing Engineer

September 2026 - Present (2 months)

Federal Operations and Services Ltd (FedServ)

10 months

Junior Software Engineer - QA

December 2025 - September 2026 (10 months)

Aluva

Software Quality Assurance Engineer

December 2025 - September 2026 (10 months)

Tested and validated banking and fintech applications, including core banking (CBS), payments, UPI, and customer onboarding workflows, to catch defects before release. Validated the end-to-end customer onboarding experience registration, verification, and data entry across frontend and backend, ensuring a smooth and error-free digital customer journey. Validated APIs and end-to-end transaction flows across systems, confirming accurate processing and data integrity. Executed functional, regression, and UAT-style API tests in

Postman and performed cross-system validation across multiple modules. Partnered with developers and business teams to investigate defects, track root causes, and support stable, on-time releases. Documented test results and defect reports clearly, giving stakeholders visibility into release readiness.

TechWyse Internet Marketing

Junior Quality Analyst

November 2024 - December 2025 (1 year 2 months)

Ernakulam, Kerala, India

TechWyse IT Solutions Pvt Ltd

Quality Analyst

2024 - 2025 (1 year)

Performed manual, functional, and automation testing for AdLuge, WorkLuge, and CallLuge, including e-commerce-facing platform features, keeping workflows stable across websites and applications. Tested e-commerce site functionality and user workflows for client sites such as Oaken Equipment, including search/keyword results, listings, and campaign-related content, to validate a consistent digital customer experience. Validated offer-code and promotion logic on e-commerce sites, confirming codes applied correctly at checkout and pricing/discount rules displayed accurately. Reviewed Voice of Customer (VOC) feedback and customer complaints to proactively identify potential site issues and inform test coverage. Tested email campaign content and calendar/scheduling features for accuracy, functionality, and consistent rendering across platforms. Performed daily website functionality checks and supported website launch validation, confirming key pages, links, and features were production-ready. Tested APIs using Postman and validated backend services, confirming accurate data flow and system integration. Wrote and maintained detailed test plans, test cases, and test scripts, improving overall test coverage and product quality. Built and ran automation scripts in Selenium and Playwright, reducing manual testing effort and speeding up release cycles. Logged, tracked, and retested defects in Jira through to closure, working closely with developers to resolve issues quickly. Used Microsoft Excel to organize test data and track testing status, results, and trends across cycles.

QSpiders - Software Testing Training Institute

Software testing trainee

May 2024 - October 2024 (6 months)

Ernakulam, Kerala, India

Education

QSpiders - Software Testing Training Institute
